# Professional Program/ Presentation Form

The theme for the 73rd Annual Conference – "Technological Design – Making it part of your Program is about helping technology education teachers in all stages make technological design a part of their program by suggesting ways to include the process in their current and future courses. This will become increasingly important since most of the New England states already include some requirement in their graduation requirement.

NEATT is accepting proposals for presentations/programs for the 2010 Annual Conference. We encourage any member of the education community to present at the conference. This is an opportunity to share your ideas and successes with technology educators from across the region!
